

Giving **ORPHANS** a new lease of life

A LIFELINE FOR Children EVERYWHERE.

We all know about the terrible consequences of natural disasters like tsunamis, hurricanes and earthquakes - they leave thousands of orphans in their wake. Children who are desperate for help in virtually every aspect of their lives.

Orphans in Need is a charitable organisation, set up to help the world's most vulnerable and needy people, regardless of faith, race or creed. We're committed to the worldwide alleviation of all forms of poverty and deprivation. Our main focus is on orphans and widows, often the weakest members of society and the most badly affected by the scourge of poverty. It's these people who now urgently need your help.

Orphans in Need is a registered charity with offices in Europe and Asia. We run and finance various poverty alleviation projects around the world. The accent is on sustainability, which is essential to the success of long-term development projects. Much of this work is centred around orphans and orphanages, as well as helping whole communities to escape the cycle of deprivation that can have such a negative impact on vulnerable members of society.

Giving orphans a new lease of life

The organisation was set up by professional people from different commercial backgrounds. Our aim is clear. We simply want to help humanity survive the rigours of deprived situations. And, we're asking you to help as well. A donation of as little as £1 per day could transform an orphan's life by providing food and shelter for a whole month. Please do it today.

A WORLD IN **need**

Orphans in Need is committed to helping the battle against poverty, starvation, illiteracy and exploitation - wherever it may be in the world. Not only in natural disaster areas like Haiti and Indonesia, but in places of man-made poverty as well. The slums of Mumbai. War-torn countries like Afghanistan. Aids-affected areas in Africa. They all need our help. These orphans are all entitled to be clothed, fed and educated in the same way as our more fortunate children. We also provide basic health care by setting up mobile clinics and medical camps, as well as raising funds for specialised treatment in cases of more serious illness. **Please help us to help them, by giving a much-needed donation today.**

THE PLIGHT OF THE ORPHAN

There are millions of orphans around the world. Children who have lost their parents through death or disappearance, abandonment or desertion, separation or loss. Just imagine what it's like to have no one to care for you at such a tender age.

There are tens of thousands of new AIDS orphans every year, having lost their fathers - the main wage earners. They have to depend on the state for care and support. Heartless institutions can destroy children's lives. There are deprived children living on city streets, spending the night in abandoned buildings or cardboard boxes. They have to beg for survival. They're often subjected to abuse, neglect, exploitation or, in extreme cases, murder.

We need you to donate today, to help to stop these awful situations across the world. That's why **Orphans in Need** has set up sponsorship programmes to help children with the basics of life, to replace the love, support and protection normally provided by parents.

As a basic necessity of humanity, we believe that every child is entitled to equality. The welfare of any child without parents, guardians or carers is the

responsibility of all of mankind. That's why our aim is to provide:

- Adequate nutrition
- Effective shelter
- Decent clothing
- Clean drinking water
- Hygienic sanitation
- Professional medical care
- Comprehensive education
- Loving care and guidance
- And a family-orientated home or institution

Saving just one of these precious young lives is like saving the whole of mankind, but we can only do it with your help.

HELP A DREAM BECOME REALITY

Well-managed orphanages.

The future for millions of needy children.

Could you imagine life without a safe and secure roof over your head? Put yourself in the position of the millions of orphans around the world and you can appreciate how important the work is that we carry out at **Orphans in Need**.

Orphans should have the best start in life to help them become useful members of society when they become adults. That's why we're constantly fundraising. Our mission is to set up a network of orphanages, particularly in new areas, as well as increasing capacity at existing ones.

Once orphanages are established, we supply financial aid, equipment, staff training, educational materials, medicines, clothing and toys. But there are other factors that can deeply influence the life of an orphan. Like love, care and protection. That's why we go to such lengths to provide more personal attention than is given at some orphanages. We want to create a close, family orientated environment by giving that extra bit of guidance to all the children in our care.

We teach them basic skills such as cooking, arts, crafts, raising crops and keeping livestock, because we want to encourage them to go forward to further education. So we make sure that our orphanages are established at places with easy access to colleges and universities. By training them to become doctors, lawyers, teachers or civil servants, we can make sure that these once-forgotten children take their rightful places as valuable members of the community. We can only achieve this by running homes with a truly caring attitude. And we can only reach these goals with the help of your generous donations.

Our current project. Serving the slums of India.

£1

It's a staggering fact - there are over 65 million orphans in Asia alone. According to a 2001 government census of India, nearly 20% of Delhi's population are slum dwellers. Orphans in Need decided that this was a deserving area to benefit from our expertise.

After careful research, we identified an ideal location, about 35km from New Delhi, as the site for a new purpose-built orphanage with an integral school. Plans were drawn up for an eco-friendly solution, with the building to include solar panels and other energy-saving features.

This orphanage will house hundreds of orphans who have lost their parents. We'll make sure that they are fed a minimum of three times a day. We'll ensure that they are well clothed and educated to the highest standards so that they can learn how to benefit society themselves when they reach adulthood. All special needs will be accommodated, including disabilities, and children will be given medical treatment and counselling if required. Our fully trained staff and volunteers will provide unconditional love and care for these children in a family-orientated environment to make sure they enjoy life to the full.

We have already purchased three acres of land at a cost of £100,000 and phase one of the work has begun. The land purchase works out to about £11 per square

yard. Could you afford to pay for a few square yards? One donation of £800,

for instance, would go towards providing an en suite double bedroom for two homeless orphans. Please donate today. Even if it's beyond your means to give a lump sum, you could pay in instalments to fit your budget. Every little helps. It's an investment that will benefit thousands of orphaned children for many years to come.

Please help to house an orphan. Call our donation hotline on 0800 999 0852 today and donate whatever you can.

BETTER *water* FOR BETTER HEALTH

Imagine having to walk for five or six kilometres to get water, only to find it's contaminated when you get there. Not only is it soul destroying, it's a waste of time for, usually, women who could be carrying out other vital tasks. Over one billion people worldwide have no access to safe drinking water and, according to the World Health Organisation, around 80% of all sickness and disease is caused by inadequate water and bad sanitation. We must put a stop to this.

Orphans in Need runs programmes to install water pumps in vulnerable areas to eradicate this problem. Just one pump could benefit around 600 people on a daily basis and dramatically improve daily life.

We also want to educate communities on the links between safe water, sanitation, diseases and unsafe hygiene practices. Simply teaching children, as well as adults, to wash their hands after using the toilet and before eating, could lead to a dramatic reduction in water-borne diseases. With these facilities readily to hand, orphans everywhere could lead far more fulfilling lives.

INVESTING IN THE *future*

Without doubt, education is the key to providing opportunities for communities to break free from poverty - preventing a vicious circle that leads to illiteracy and yet further poverty. With your help, we can provide the gift of education, which so crucially needs to start at an early age.

Orphans in Need is providing basic schools, often in inaccessible locations, to educate orphans and other needy people. This involves the distribution of school equipment, books and computers, as well as paying for teachers to be trained to more competent and professional levels.

We concentrate on three areas:

- **Literacy** - to teach orphans to write in their own language, as well as English.
- **Numeracy** - to help them with commerce and avoidance of unfair trade practices when they start to earn a living.
- **Vocational studies** - to teach them about land management, conservation awareness, diet and nutrition, crop rotation, family health and hygiene practices.

After a basic education, we encourage children to enrol at a college or university for further education. We want to finance orphans to attain professional qualifications so that they can, in turn, become valuable members of society by helping others to improve their lives. Every pound that you can give will help this cause.

MEDICAL *treatment* FOR ALL

We take our medical health facilities for granted. Others are not so lucky. Even the most basic medical care is beyond the reach of many of the world's poor.

Orphans in Need want to improve medical camps in rural areas where people have little or no access to any form of healthcare. We can provide this vital service, saving lives and bringing comfort to the sick. Our services include minor surgery, diagnosis of common ailments, immunisation programmes and dispensation of essential medicines.

The medical camps are supported by mobile clinics to give us access to isolated communities. As well as essential healthcare, we also teach people about good hygiene and the causes of common diseases. Combined with food and nutrition training and water and sanitation projects, our camps make sure that all the essentials are brought together to improve overall health and reduce malnutrition.

If a patient needs more specialised treatment, or in cases of acute illness, we often release funds that go towards their treatment and other associated areas, as well as transport if needed. But all this costs money - your donation could help to save a valuable young life.

PERMANENT *community* HOSPITALS

As well as temporary medical camps and mobile clinics, we also strive to provide more permanent facilities for the longer-term benefit of deprived communities. Part of our fund-raising programme is dedicated to building hospitals with modern equipment in the most needy worldwide locations.

We provide training for medical, nursing and allied health professionals to staff these hospitals on a permanent basis. They are on hand to help the wider community, as well as cases of deprivation, by giving free medical treatment to all. The advancement of health and the saving of lives is just part of our far-reaching humanitarian programme around the world.

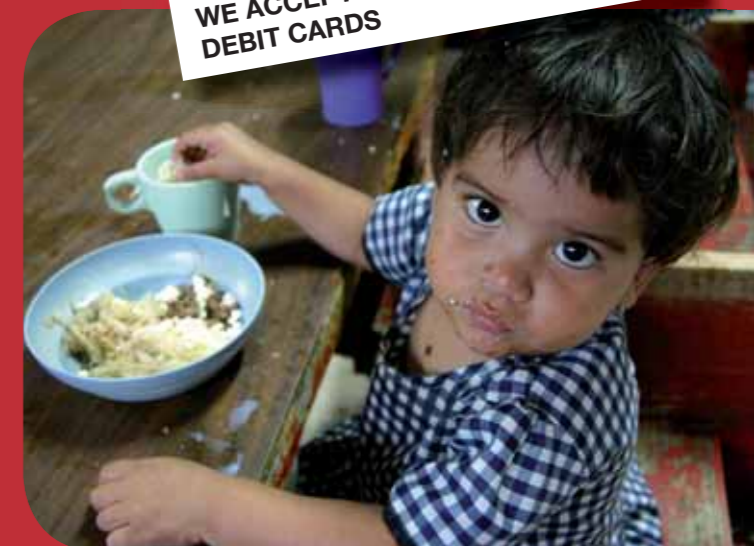

GLOBAL EXPERIENCE IN EMERGENCY RELIEF

Orphans in Need plays a leading role in the global battle against poverty, starvation, illiteracy and exploitation. We have over a decade of experience in this sector, so we understand the problems and we have the infrastructure to react quickly in times of crisis.

We are aware though that it's not always possible for our organisation to reach some areas for reasons beyond our control. That's why we observe an international programme of partnerships with like-minded bodies - organisations such as the World Food Programme, the United Nations and the MGR. By maintaining our emergency relief fund, we can ensure that monies are directed to them if necessary, without impacting on our own planned projects.

Because of our holistic approach, **Orphans in Need** can be relied on to deliver your donations safely and effectively to wherever they're needed. We're also proud to be the charity that helps other charities to realise their goals, in the worldwide need to combat the dreadful effects of natural disasters, wars or social unrest.
